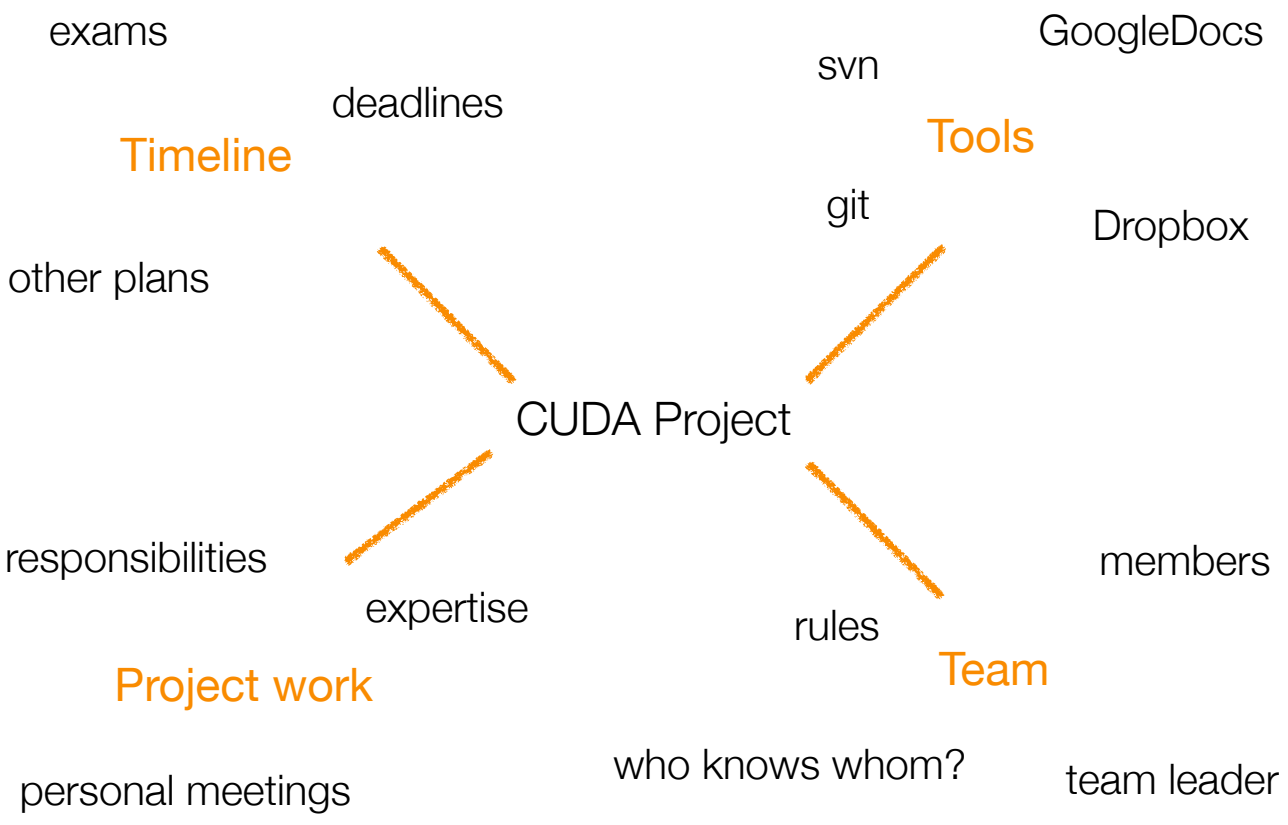
Teamwork during the CUDA Project



Please meet with your group and discuss the topics sketched above. It will be important for your project work that you know your team members well and agree about :

- how to work
- how to code
- how to comment the code
- which code versioning tools to use
- etc.

Please prepare a **presentation/report of about 5 minutes** until tomorrow morning, (Thursday August 29th) where you inform the other groups about what you agreed.
