

# Visual Navigation for Flying Robots

## Exercise 4 – Project Proposals

Dr. Jürgen Sturm  
Nikolas Engelhard

# Presentations

- 7 project proposals
- All project proposals are very nice!
- 5 minute presentation
- 5 minute discussion and feedback
- We would like to put your slides on the course website
  - Let us know when you do not consent

# What the Audience Wants

According to an international study of the consulting firm Mercer, the audience wants to be

1. impressed
  2. entertained
  3. inspired
  4. informed
- (in this order!)

# Feedback after the Presentation

- Have you been inspired?
- Is the project feasible in 4 weeks?
- Give (constructive) suggestions on
  - the presentation itself (body language, ...)
  - making the project feasible
  - possible extensions for the future
  - other ideas/comments

# Project Implementation

- Break it down into milestones and implement it step by step
- Have (and make use) of fall-back plan(s)
- Document your progress/achievements (video, photos)
- We would like to produce a summarizing video of your projects in the summer (for which we need your input)
