Visual Navigation for Flying Robots
D. Cremers, J. Sturm, J. Engel, C. Kerl
Summer Term 2013

Computer Vision Group
Department of Informatics
Technical University of Munich

Sheet 5

Topic: Proposal

Submission deadline: Thu, 04.07.2013, 08:00 a.m.
Hand-in via email to visnav2013@vision.in.tum.de

Exercise: Midterm Presentation

The goal of the mid-term presentation is to give us a short status update on your mini-project. Our recommendation is that you prepare a short presentation consisting of 3–5 slides with the following structure:

(a) First slide: Project title, team name, team members. Remind people who you are and what you want to do in your project. An illustrative figure (possibly the same as last time) helps people to remember.

(b) Second slide: Your work/achievements so far. A video (if you have one already) is definitely a plus and helps people to understand better the current state of your project and the challenges.

(c) Third slide: Your plans for the next two weeks. Possibly include an updated list of milestones and project goal.

Submission instructions

Please submit your presentation slides as a PDF via email to `visnav2013@vision.in.tum.de`.
